

Young North Public School

Curriculum & Instruction Team
Update from Mr Dabin

Math is Fun!

Working together to make change.

Numeracy is a key part of schooling and life. Success in numeracy can often be seen as difficult for some students. At YNPS, we are working on changing the way students see Mathematics from Math is hard to Math is great!

School Partnerships

As a curriculum and instruction team, we are working closely with a group of educators across the Temora Network, to identify areas in Numeracy we are successful in and areas we need to develop. This project includes working within a focus group of Young North Public School, Young Public School, Young High School, the Director of Educational Leadership, Carolynne Merchant and Numeracy Specialist, Jane Strachan. This group aims to provide consistent teaching to ensure success for students heading into high school and develop an enjoyment for numeracy through the following processes.

Big Ideas to Start Strong: Becoming Mathematicians

Our staff engaged in the first session of the Big ideas to start strong professional learning in Mathematics during our recent staff meeting.

They enjoyed the challenge that was set for them to engage in critical thinking and strong conversations about their reasoning.

You can try this at home too!

At Home Challenge!

Things you need:

- A square piece of paper 10cm x 10cm
- A pair of scissors.

The task:

Your task is to cut a hole into your piece of paper large enough to squeeze a person through.

Send in your photos of your attempts at success. Which way worked best? What didn't work?
